SYSTEM OF NATIONAL ACCOUNTS

Input-Output Tables

THE INPUT-OUTPUT STRUCTURE OF  
THE CANADIAN ECONOMY, 1961

VOLUME 2

Published by Authority of

The Minister of Industry, Trade and Commerce

October 1969  
1900-502

Price: \$3.00

## P R E F A C E

The preliminary 1961 Input-Output Tables published in this Volume and in Volume 1 ("The Input-Output Structure of the Canadian Economy, 1961 - Volume 1", catalogue no. 15-501) include a set of Input-Output Accounts which form part of the System of National Accounts, and tables which can be used for a variety of analytical purposes. Volume 1 includes tables for two aggregations of the system - 16 industries by 40 commodities, and 65 industries by 65 commodities; this Volume consists of tables for a third aggregation - 110 industries by 197 commodities. The descriptive material and classification systems for all three aggregations are contained in Volume 1. Chapter 4 of Volume 1 describes all the Tables published in this Volume.

This is the second set of Canadian Input-Output Tables to be published by the Dominion Bureau of Statistics; the first was for the year 1949. In addition to being more detailed, the 1961 Tables have been constructed within a conceptual framework which differs considerably from that of the 1949 Tables.

The Input-Output Research and Development Staff is under the direction of Mr. T. Gigantes. Other Staff economists who have made substantial contributions to the studies are I.H. Midgley, P.R. Pitts, Mrs. S. Nijhowne, A.M. Friend, C. Gaston, R. Hoffman, K. Lal, S. O'Brien and Mrs. L. Emmerson.

The Staff has benefited from the assistance of many individuals in other Bureau divisions, and from consultation with outside researchers, particularly Professor T.I. Matuszewski of Université Laval, Professor K. Levitt of McGill University, Professor G. Rosenbluth of the University of British Columbia, and Professor J.A. Sawyer of the University of Toronto.

WALTER E. DUFFETT,  
Dominion Statistician.

## THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks, and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with catalogue nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data, (catalogue nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (catalogue nos. with prefix 15). The Indexes of Real Domestic Product by Industry (included with catalogue nos. carrying the prefix 61) provide "constant dollar" measures of the contribution of each industry to gross domestic product at factor cost. Inputs and outputs are related in Productivity Studies (catalogue nos. with prefix 14).

Both the Input-Output Tables and Indexes of Real Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (catalogue nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics, and the legal entity is the main unit of classification of transactors. Also, provision is made in the System for incorporation of balance sheet (wealth) estimates when such data are sufficiently developed.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated subsystems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, the Dominion Bureau of Statistics is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, "A System of National Accounts" (Studies in Methods, Series F., No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968). In the future, a document on the conceptual framework of the Canadian System of National Accounts will be prepared for publication by the Dominion Bureau of Statistics. This document will furnish the broad theoretical outline of the System. The finer conceptual details, the statistical tables, and the descriptions of sources and methods as they pertain to the individual parts of the System, will appear in the various regular and occasional publications relating to those parts.

### List of Tables

Table 13	Values of Industry Inputs and Final Expenditures, 1961 - Aggregation L	10
14	Industry Input and Final Expenditure Coefficients - Aggregation L	85
15	Impact Table without Import Leakages - Aggregation L	160
16	Impact Table with Import Leakages - Aggregation L	235
17	Valuation Conversion Coefficients - Aggregation L	310

## I N T R O D U C T I O N

This Volume is an extension of Volume 1 of "The Input-Output Structure of the Canadian Economy, 1961" (Catalogue No. 15-501). The user of Volume 2 will require a copy of Volume 1 which contains the descriptive material relating to the accounting framework and analytical uses of the 1961 Tables. Tables for three levels of aggregation of the data are published:

- Aggregation S (16 industries by 40 commodities) in Tables 1 - 7 of Volume 1
- Aggregation M (65 industries by 65 commodities) in Tables 8 - 12 of Volume 1
- Aggregation L (110 industries by 197 commodities) in Tables 13 - 17, Volume 2

The industry and commodity classification systems for Aggregation L are included in Appendix B of Volume 1 and are explained in Chapter 5 of that publication.

The content of each of the five tables in Volume 2 is outlined in Chapter 4 of Volume 1.
